PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience in Python, SQL, Excel, Power BI, and Tableau. Skilled in data analysis, data cleaning, exploratory data analysis (EDA), data visualization, and deriving actionable insights. Familiar with machine learning concepts and Big Data technologies, including Hadoop, HDFS, and MapReduce. Strong analytical, problem-solving, and communication skills, with a keen interest in applying data driven approaches to solve real-world business problems and support informed decision-making.

TECHNICAL SKILLS

- **Programming:** Python, SQL (MySQL)
- **Data Analysis:** Pandas, NumPy, Microsoft Excel
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Machine Learning:** Scikit-learn, Linear Regression, Logistic Regression, Decision Trees, Random Forest
- **Tools & Technologies:** Git, GitHub, Jupyter Notebook, Linux

INTERNSHIPS

Data Analyst Intern - Pyroferus Technologies | January 2026 – March 2026

- Performed data cleaning, transformation, and EDA using Python, SQL, and Excel.
- Analyzed datasets to identify trends, patterns, and actionable business insights.
- Developed Power BI dashboards to track KPIs and used SQL to analyze data and generate insights.

SQL Intern - Mighty Infotech | July 2025 – August 2025

- Developed and executed SQL queries using joins, aggregations, subqueries, filtering, and sorting to retrieve and analyze data.
- Performed data extraction, manipulation, and analysis using SQL in a MySQL environment.

Python Programming Intern – CodSoft | April 2024 – May 2024

- Developed Python-based applications and scripts to automate tasks, process data, and solve programming challenges.
- Performed data handling, preprocessing, and data analysis using Python libraries.
- Implemented Python functions and modules to build reusable and efficient programming solutions.

PROJECTS

Adaptive Conversational System for Automated Customer Support Management

- Developed an AI-powered customer support system using Conversational AI, NLP, and RAG to automate customer interactions.
- Implemented intent detection, sentiment analysis, and automated ticket management.
- Built a responsive web application for customer query handling, ticket tracking, and real-time analytics.

Diabetes Prediction System | Python, Pandas, NumPy, Scikit-learn

- Developed a Diabetes Prediction System using machine learning on the PIMA Indians Diabetes Dataset.
- Performed data preprocessing, feature scaling, and exploratory data analysis (EDA) using Python.
- Trained and evaluated multiple ML models, with Random Forest achieving the best performance based on classification metrics.

Airline Delay Analysis | MySQL, Tableau

- Analyzed airline delay and cancellation data using MySQL to identify operational trends and insights.
- Built interactive Tableau dashboards to visualize on-time performance and delay patterns.
- Generated actionable insights from airline performance data to support data-driven operational decision making.

EDUCATION

Bachelor of Engineering (B.E.) In Computer Science

GPA: 8.1 | 2022 – 2026

Dhaanish Chennai College of Engineering, Chennai, Tamil Nadu

Higher Secondary Education

2021 – 2022

SRVS National Higher Secondary School, Karaikal, Puducherry

CERTIFICATIONS

- Python for Data Science - Udemy
- SQL for Data Analysis: Advanced SQL Querying Techniques - Udemy
- Microsoft Power BI: Advanced DAX for Data Analysis - Udemy
- Introduction to Excel - Coursera
- Introduction to Soft Skills - TCS iON

LEADERSHIP & ACTIVITIES

- Dhaanish Blood Donors (Volunteer)
- Participated in clean-up drives and social service activities.

LANGUAGES

- English (Professional) | Tamil (Native)
