PROFESSIONAL SUMMARY

Computer Science Engineering graduate with a strong foundation in Python programming, SQL, data analysis, and problem-solving. Skilled in data cleaning, exploratory data analysis (EDA), data visualization, and database management. Familiar with Machine Learning concepts, software development, and data visualization tools such as Power BI and Tableau. Knowledgeable in Big Data technologies, including Hadoop, HDFS, and MapReduce. Strong analytical, communication, and critical-thinking skills with a passion for learning new technologies and developing efficient, data-driven solutions.

TECHNICAL SKILLS

- **Programming:** Python, SQL (MySQL)
- **Data Analysis:** Pandas, NumPy, Microsoft Excel
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Machine Learning:** Scikit-learn, Linear Regression, Logistic Regression, Decision Trees, Random Forest
- **Tools & Technologies:** Git, GitHub, Jupyter Notebook, Linux

INTERNSHIPS

Data Analyst Intern - Pyroferus Technologies | January 2026 – March 2026

- Performed data cleaning, transformation, and EDA using Python, SQL, and Excel.
- Analyzed datasets to identify trends, patterns, and actionable business insights.
- Developed Power BI dashboards to track KPIs and used SQL to analyze data and generate insights.

SQL Intern - Mighty Infotech | July 2025 – August 2025

- Developed and executed SQL queries using joins, aggregations, subqueries, filtering, and sorting to retrieve and analyze data.
- Performed data extraction, manipulation, and analysis using SQL in a MySQL environment.

Python Programming Intern – CodSoft | April 2024 – May 2024

- Developed Python-based applications and scripts to automate tasks, process data, and solve programming challenges.
- Performed data handling, preprocessing, and data analysis using Python libraries.
- Implemented Python functions and modules to build reusable and efficient programming solutions.

PROJECTS

Adaptive Conversational System for Automated Customer Support Management

- Developed an AI-powered customer support system using Conversational AI, NLP, and RAG to automate customer interactions.
- Implemented intent detection, sentiment analysis, and automated ticket management.
- Built a responsive web application for customer query handling, ticket tracking, and real-time analytics.

Diabetes Prediction System | Python, Pandas, NumPy, Scikit-learn

- Developed a Diabetes Prediction System using machine learning on the PIMA Indians Diabetes Dataset.
- Performed data preprocessing, feature scaling, and exploratory data analysis (EDA) using Python.
- Trained and evaluated multiple ML models, with Random Forest achieving the best performance based on classification metrics.

Customer Churn Prediction Model | Python, Pandas, NumPy, Scikit-learn

- Developed a Customer Churn Prediction Model using Logistic Regression and Random Forest algorithms.
- Performed data preprocessing, EDA, and feature engineering using Python; achieved approximately 73% accuracy.

Airline Delay Analysis | MySQL, Tableau

- Analyzed airline delay and cancellation data using MySQL to identify operational trends and insights.
- Created interactive Tableau dashboards to visualize on-time performance and delay patterns.

EDUCATION

Bachelor of Engineering (B.E.) In Computer Science GPA: 8.3 | 2022 – 2026
Dhaanish Chennai College of Engineering, Chennai, Tamil Nadu

Higher Secondary Education 2021 – 2022
SRVS National Higher Secondary School, Karaikal, Puducherry

CERTIFICATIONS

- Python for Data Science - Udemy
- SQL for Data Analysis: Advanced SQL Querying Techniques - Udemy
- Microsoft Power BI: Advanced DAX for Data Analysis - Udemy
- Introduction to Excel - Coursera
- Introduction to Soft Skills - TCS iON

LEADERSHIP & ACTIVITIES

- Dhaanish Blood Donors (Volunteer)
- Participated in clean-up drives and social service activities.

LANGUAGES

- English (Professional) | Tamil (Native)
